Inspiring Cosmetics

**Alban Muller International** excels in all its production processes from the harvest to packaging, from the manufacturing of plant extracts and actives to cosmetic formulation - a complete offer for every need. In line with its eco-responsible approach and respect of the plant resource. Alban Muller develops 100% natural, eco-designed plant extracts, they are manufactured with eco-friendly, high performance and A.M.I. exclusive processes, perfectly adapted to the extraction and the preservation of active molecules. Their tested actives with proven efficacy stem from their R&D expertise and the latest scientific advances.

**Citróleo** is a Brazilian manufacturer of natural and sustainable raw materials from Brazilian biodiversity. Their raw materials add quality and benefits to a wide range of products for personal care and cosmetics. CitroGreen Natural actives with proven efficacy and dermatologically tested: CitroForest Line of natural products from Brazilian biodiversity where all products are 100% pure and natural. CitroNature Alpha Bisabolol is certified natural and organic. CitroTech Natural surfactants from vegetable sources and free from palm oil.

**Derbiotec** is a Peruvian company specialising in adding value to the traditional Peruvian Tara Tree via biotechnological transformation. A leader in high quality standards with a deep respect for the principles of biodiversity and the environment.

**Evident Ingredients** provides modern alternative preservation and product protection solutions as well as a range of natural emulsifiers. With access to new and sustainable technologies, the possibilities of safe preservation has changed fundamentally. Nature-identical food preservatives have gained attention as well as antimicrobial, multi-functional ingredients. These act as boosting agents for mild and skin friendly preservatives and provide the opportunity to work completely without traditional preservatives.

**Infinity Ingredients Elements** is our own range of oils and butters. Carefully sourced from around the world, we have everything from basic oils to the exotic and rare, many of which are available as Certified Organic products. If what you are looking for is not in our standard range, we will source your material using our extensive network of growers, suppliers and traders.

**Kahai SAS** from Colombia is the first company in the world to industrialise the Cacay (*Caryodendron orinocense* Karsten) species, an Amazon tree that produces highly nutritious nuts from which a precious oil is extracted. Kahai Oil is a cold pressed, 100% natural and proven anti-ageing oil. It has a high skin penetration capability with a dry feel, and a mild nutty scent that quickly fades. Its high content of Vitamin E, F and also Vitamin A (Retinol) nourishes, softens and repairs, damaged skin and hair.

**K.S. Pearl** offers complete surface treatments as well as fine texture powders. By carefully selecting high quality powder materials and applying their state of the art surface technology, K.S. Pearl provide perfect quality powders to help cosmetic formulators successfully develop innovative products and create new beauty.

**Lucas Meyer Cosmetics** offer proven active ingredients designed to maintain the body's natural reactions, strengthen its defences against environmental aggressions, and delay the signs of ageing. Their functional ingredients deliver unique texture, skin feel and optimal product performance, while their Phospholipid-based delivery systems offer technical vectors to increase the efficacy and stability of active ingredients.

**ROELMI HPC**'s range of active ingredients is developed from biotechnological or naturally based plant sources all supported by extensive in-vitro and in-vivo studies and detailed safety profiles. This includes their range of full spectrum Hyalurons for targeted biological action on skin as well as highly efficacious natural actives and patented delivery platforms. Their speciality functional materials include olive-derived emulsions, liquids and waxes, as well as fruit waters and novel, natural and biodegradable alternatives to Palm oil derived esters and plastic microbeads.

**Salvona** specialise in the development and production of cutting edge encapsulation technology for the personal care, pharmaceutical and household markets. In addition to their extensive range of standard products, Salvona work with customers to design bespoke solutions.

**Southern Cross Botanicals** are part of the IFF | Lucas Myers Cosmetics Company, offering expertise in the fields of botany, agronomy and biology. With strong focus on sustainable use and preservation of national resources, Southern Cross Botanicals specialises in developing ingredients exclusively derived from native Australian plants.

**TC USA Inc.** is comprised of three distinct product lines which offer performance driven, highly functional, cost effective, natural and natural based specialty ingredients: Essa Technologies (natural based skin feel modifiers and gelling agents), TCL Innovations (natural and plant based specialty surfactants and mild cleansing systems) and Zenitech (patented line of film formers, moisturisers, conditioners and glossing agents).

## About Infinity Ingredients

Infinity Ingredients is a refreshingly different distribution company specialising in the sourcing and supply of active and functional ingredients for the cosmetic and personal care markets in the UK and Ireland. We balance our supplier range between well-established trusted Principals, and suppliers and raw materials which have not been seen before in our market.

Our vision is to provide an informative, efficient and bespoke experience for all our customers, to aid in their development of innovative cosmetic products with a real point of difference. We create a truly personal partnership with our Principals, driven by service and underlined by a philosophy of honesty and fairness.
