

COSMOS Gelifiers

Ina Kanten CS-310TR

Low molecular weight with a narrow distribution. First agar to allow soft gels formulation.

Feature	Ina Kanten CS-310TR
INCI	AGAR
Chinese INCI	琼脂
Origin	Red algae
Salt resistance	High
Gel type	Soft gels
pH	6.5 ±1.0

Aspect of the soft gel

Brings **moisture & light diffusion effect**. Enhances the **sensoriality** of formulas and brings **softness**.

Quick Konjac TR

Fast dissolution & viscosity konjac powder. Maximum viscosity reached in 10~20min

Feature	Quick Konjac TR
INCI	GLUCOMANNAN
Chinese INCI	葡甘露聚糖
Origin	Konjac plant
Salt resistance (Na)	High
Cation tolerance (Ca)	High
pH	5 to 9
Gel type	Very light to rich

- Natural konjac allowing **quick and high viscosity**.
- Enhanced version of Konjac allowing **better sensoriality**.
- Enhances **moisture** content.
- **Low smell** and wide **stability**.

In a few words

Ina Kanten CS-310TR

- From red algae
- Fresh & watery feeling
- For soft gels

Quick Konjac TR

- From konjac plant
- Rich & moisturizing feeling
- From slight viscosities to hard gels
