

COPTIS' EXPERTISE

Initialization of Coptis Lab with your raw materials, formulas etc.

User-friendly interfaces enable a permanent link between the Coptis Lab software and manufacturing software (ERP).

Training: onsite or online training.

Customer service & Technical support: high customer satisfaction and fast response time (NPS score: 86%)

ABOUT US

Having extensive “IT and Cosmetic Market” expertise, Coptis is at the forefront of software for cosmetic laboratories and has been in the market for over 25 years. Coptis has offices in France, the United States and Singapore. Coptis consists of a team of 40 people, primarily in the domains of chemistry and computer science, who **ensure the constant improvement of its products**. This is further guaranteed by Coptis’ cosmetic expertise, its **User Club and recommendations** coming directly from the customer base. All improvements made to the software suite are integrated as standard for the benefit of all users, making Coptis a leader in the cosmetics industry.

Coptis is **actively working on cutting-edge technologies, including artificial intelligence** to further improve the performance of cosmetic developments.

Coptis™

PLM SOFTWARE FOR COSMETIC LABORATORIES

Speed up formula development and ensure global regulatory compliance with **digital technologies**

SUPPORT INNOVATION FROM CUSTOMER'S NEEDS TO MARKET COMPLIANCE.

Coptis Lab PLM software, is specifically designed for cosmetic formulation laboratories and global regulatory compliance. **It includes the various stages of the development of a cosmetic formula**, from the marketing brief to production.

MAIN FUNCTIONS

- ✓ Optimize raw materials data management
- ✓ Accelerate product development
- ✓ Ensure global regulatory compliance
- ✓ Manage ingredients blacklist
- ✓ Centralize and generate automated cosmetic dossier
- ✓ Perform tests and automate schedules
- ✓ Packaging module and inventory management included
- ✓ Join the AI R&D program to predict the stability of a formula

KEY CONCEPTS

- Project management
- Safe and sustainable formulation
- Global regulatory and market compliance
- Traceability and transparency
- Secure and controlled user access
- Increased collaboration and knowledge management
- Time saving and reactivity

BENEFITS

Design safe & sustainable formulation

Digitalize & centralize product development process

Achieve global compliance in real time

Improve time to market & boost ROI

CoptisTM Ing

- 100% cosmetic database: 17,000 raw materials & 30,000 technical documents
- Access to validated information by raw materials suppliers
- Export data to Coptis Lab with one click
- Search using up to 50 different criteria

CoptisTM Reg

- Achieve regulatory compliance in-house
- Identify noncompliance with real time alerts in Coptis Lab
- Access to data validated by regulatory professionals
- View ingredient restrictions by country and zone

CoptisTM Tox

- Access to toxicology information of more than 3,000 substances
- Generate the toxicological profile of each substance of a formula
- Calculate MoS automatically for each ingredient
- Predict the safety of formulas prior to batching
