High-Performance Hair
& Skincare Ingredients

AminoSensyl™

Series

Why did Inolex create the AminoSensyl™ Series of ingredients?

We designed the AminoSensyl™ series of natural and sustainable conditioners to create the future of hair care today. Quaternized conditioners are critical for performance but have major trade-offs. With AminoSensyl™ technology, we proactively address consumer demand for products made with safer and more environmentally-friendly ingredients while having the same great performance they love.

How are AminoSensyl™ Series ingredients sustainably designed?

Feedstocks for AminoSensyl™ Ingredients are responsibly sourced to prevent environmental harm and resource depletion.

AminoSensyl™ technology offers multiple benefits, such as hair conditioning, strengthening, and nourishing skin feel so you can formulate sustainable, effective, and high-quality products.

AminoSensyl™ Ingredients meet the demand for natural, eco-friendly options, helping brands align with customer values.

AminoSensyl™

Ultra MB

Cetearyl Alcohol (and) Brassicyl Valinate Esylate

100% Natural BTAC Replacement

Say goodbye to heavy, lifeless hair and hello to smooth, defined, and strengthened locks. This 100% Natural and COSMOS approved ingredient uses cationic amino lipid technology to provide deep moisturization and create luxurious textures. This conditioning system is designed for all hair types, including curly hair. Experience the ultimate in hair care with AminoSensyl™ Ultra MB.

AminoSensyl™

HC

Brassica Alcohol (and) Brassicyl Valinate Esylate

100% Natural Quat-Free Hair Care System

Transform your hair care formulations with AminoSensyl™ HC, the COSMOS approved, non-quat complete conditioning system with cationic amino lipid technology. Farewell to frizz and welcome to silky, smooth, and defined locks. AminoSensyl™ HC provides moisturization and rich textures, creating weightless conditioning that smooths, defines, and strengthens hair.

AminoSensyl™

SC

Brassica Alcohol (and) Brassicyl Valinate Esylate (and) Brassica Glycerides

100% Natural Cationic Emulsification System

Upgrade your skincare formulations with AminoSensyl™ SC's cutting edge amino lipid technology. This self-emulsifying system creates gentle, nourishing skincare formulations with deep moisturizing and powdery soft skin feels. It's PEG-free and creates lamellar gel networks to stabilize oil loads up to 40%.

Why formulate with the AminoSensyl™ Series of ingredients?

Not only are AminoSensyl™ ingredients gentle on hair and non-irritating to the skin and eyes, they're also gentle on the environment. Designed with green chemistry, these non-aquatoxic and readily biodegradable breakthrough ingredients combine sustainability with performance so you can feel confident designing your next generation of hair and skincare products.
