

Explore our possibilities  
with your molecules and  
plant extracts

In house R&D

A process that meets  
the molecule's constraints as  
well as your requirements.

## Our technology **PhytoVec®**

Takes care of all active molecules and optimizes their performances. From your ideas to your formula, our process ensures high concentration and biodisponibility of actives molecules without impact on your galenic stability.

### OPTIMIZATION OF MOLECULES EFFICIENCY

Our catalogue

China compliant

Sytenol®A, a brand from **SYTHEON** ...making innovation work

Tailor-made

- 1 FEASIBILITY TESTS**  
Compatibility & stability  
Particle formation
- 2 DEVELOPMENT STUDIES**  
Concentration scale up & stability  
Penetration test- Optional
- 3 INDUSTRIALIZATION**  
Pilote production  
Regulatory, registration,  
technical documentation

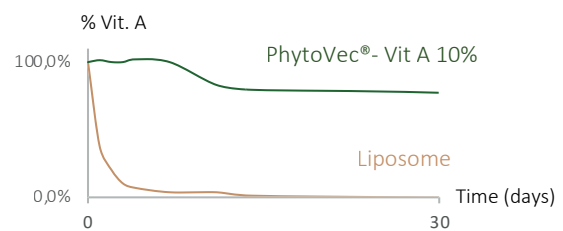

### Focus **PhytoVec®- Vit A 10%**

- ❖ **10** times higher concentration than usual commercial Vitamin A liposomes
- ❖ Instantly soluble in water at room temperature

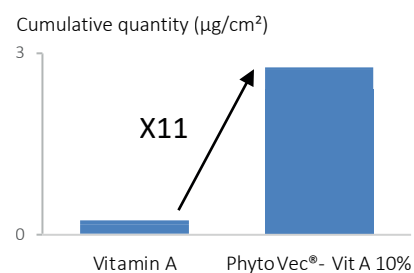

**80%** Vitamin A protection in daylight

Stability studies

**X 11** times more penetrating than free vitamin A

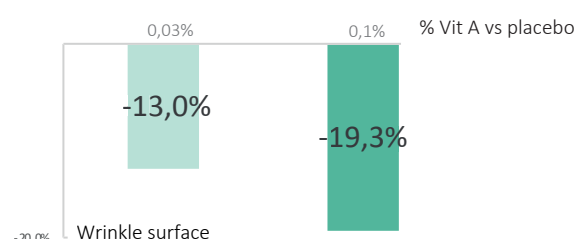

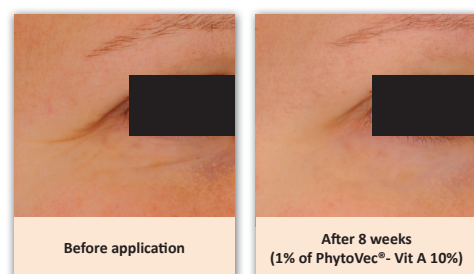

Penetration studies

**up to -45%** of wrinkles (an average of **-19%**)

**100%** of participants observed a wrinkles reduction

In vivo
